Course description*

Students will have the opportunity to engage critically with narrative and expository text, read widely, and assess their own abilities. These courses prepare and support students for working with text at the secondary level. Literacy courses offered emphasize strategy and achievement in all or some of the following areas: comprehension, critical thinking, writing, vocabulary development, and fluency. Students are placed in courses based on the results of standardized tests and teacher input. In this course, students will often be placed into smaller instruction groups to target learning. Once students meet their literacy goals, they are moved to a new course. Students enrolled in this literacy course typically spend two years in the department.
